

## Slide

- klik 2030: CAU aims to become net zero by 2030
- Focus areas: Electricity, mobility, heating, waste management, water, construction
- Monitoring of status quo & developments: Environmental management system EMAS
- Examples of success:
  - \* Electricity/heating > 75 % CO<sub>2</sub> emission reduction:  
energy consulting & energy saving campaign;  
reduction due to switch to green electricity & reduction of consumption  
(mainly via cooling and night set back of ventilation of labs)
  - \* Waste 40 % reduction:  
E.g., via two-sided printing & less printing
- Next steps: CAU cars, energy management software, swap shops/inventories
- Continued discussion
